

Onslaught[®] FAST CAP

Spider & Scorpion Insecticide

Onslaught[®] FastCap provides fast-acting and long-lasting residual control of spiders, scorpions and a broad spectrum of other insects.

- Fast acting microencapsulated formula kills fast
- Unique formula contains Exponent[®] brand synergist and two other active ingredients
- Onslaught FastCap is flexible – it may be used indoors and outdoors, in homes and in food and non-food areas of commercial structures
- Indoor broadcast treatment option
- Onslaught FastCap may be used in and around livestock facilities, on turf, ornamentals and landscapes
- Easy-to-use polymeric formulation
- Economical to use

Product Specifications

Signal Word	Caution
Packaging	Pints (6 per case)
EPA Registration Number	1021-2574
Food Handling	For use in food and non-food areas
Stability of Undiluted Product	Stable
Stability of Diluted Product	Do not allow to stand overnight. Agitate thoroughly during mixing and periodically after diluted.
Appearance	Creamy, yellow/light brown
Odor	Slight, sweet odor
Active Ingredients	Esfenvalerate, Prallethrin, piperonyl butoxide
Flammability	Not classified as flammable or combustible by OSHA
Mode of Action	Sodium channel modulator – disrupts insects' nervous system. Inhibits mixed function oxidative system.
Class of Chemistry	Pyrethroid, synergist
Respirator Required	Not required
Mix or Dilute in	Water only
Activity	Residual – up to 12 months
Shelf Life	3 years in original commercial packaging

Use Areas

Indoor in Food and Non-food Areas, such as:

Homes
Food processing plants
Restaurants
Schools
Warehouses
Hotels

Outdoor Perimeter Treatments to Areas, such as:

Around garbage cans
Porches
Patios
Carports
Garages
Fence lines

On Trees, Lawns, Landscapes and Turf

In and Around Livestock Housing

Method of Application

- Indoor and outdoor broadcast surface treatment
- Crack and crevice treatment
- Spot treatment
- Perimeter spray
- Foliar spray treatment
- Tank mix or apply alone
- Injection into wall voids

Best Practices when using Onslaught® FastCap Microencapsulated Insecticide

Dilute with water only

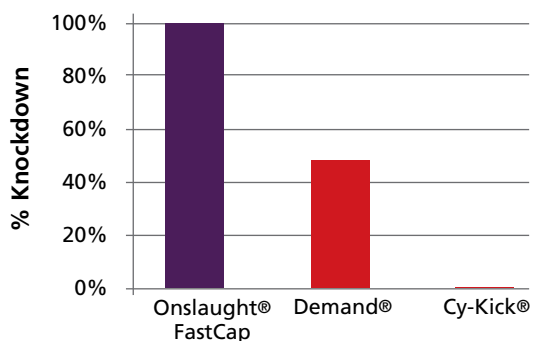

The suspension is only intended for dilution in water, not oil.

% Knockdown after 15 minutes
Black Widow, *Latrodectus*

SRL Lab 2012

% Knockdown after 15 minutes
Bark Scorpion, *Centruoides*

SRL Lab 2012

For a complete list of insects controlled, refer to the product label.

Always read and follow label and MSDS directions.

Test the surface first

Onslaught FastCap may be sprayed on any surface that will not be stained by water. If you are concerned about staining or are not sure if a surface is water safe, test the surface by spraying a small amount in an inconspicuous area before making a broad application.

Mixing tip

Shake Onslaught FastCap bottle well prior to mixing. Clean spray equipment before using or diluting Onslaught FastCap. For dilution, add ½ the required water to spray tank, then add the appropriate amount of Onslaught FastCap. Agitate the mixture, and then slowly add the remainder of the water. Agitate the spray thoroughly before using and also occasionally during use to ensure dispersion. If you use a spray filter screen, they should be 50 mesh or larger.

Use Onslaught FastCap as part of an IPM program

Tank mix Onslaught FastCap with an IGR such as NyGuard® IGR Concentrate to break the insect growth cycle and control future emerging insect populations. Do not apply Onslaught FastCap as a fog or space spray. Fog first with a product such as Riptide® Water-Based Pyrethrin ULV to get the quick knockdown action of the fog followed by a surface application of Onslaught FastCap for residual control.

Key Insects Controlled

Onslaught FastCap is labeled for the control of the following insects and other listed pests:

- | | |
|------------------------------------|-------------------------|
| Ants | Saw-tooth Grain Beetles |
| Asian Lady Beetles | Scorpions |
