

# Onslaught<sup>®</sup> FAST CAP

## Spider & Scorpion Insecticide

Onslaught<sup>®</sup> FastCap provides fast-acting and long-lasting residual control of spiders, scorpions and a broad spectrum of other insects.

- Fast acting microencapsulated formula kills fast
- Unique formula contains Exponent<sup>®</sup> brand synergist and two other active ingredients
- Onslaught FastCap is flexible – it may be used indoors and outdoors, in homes and in food and non-food areas of commercial structures
- Indoor broadcast treatment option
- Onslaught FastCap may be used in and around livestock facilities, on turf, ornamentals and landscapes
- Easy-to-use polymeric formulation
- Economical to use

### Product Specifications

|                                       |  |
|---------------------------------------|--|
| <b>Signal Word</b>                    | Caution  |
| <b>Packaging</b>                      | Pints (6 per case)   |
| <b>EPA Registration Number</b>        | 1021-2574  |
| <b>Food Handling</b>                  | For use in food and non-food areas   |
| <b>Stability of Undiluted Product</b> | Stable   |
| <b>Stability of Diluted Product</b>   | Do not allow to stand overnight. Agitate thoroughly during mixing and periodically after diluted.      |
| <b>Appearance</b>                     | Creamy, yellow/light brown   |
| <b>Odor</b>                           | Slight, sweet odor   |
| <b>Active Ingredients</b>             | Esfenvalerate, Prallethrin, piperonyl butoxide   |
| <b>Flammability</b>                   | Not classified as flammable or combustible by OSHA   |
| <b>Mode of Action</b>                 | Sodium channel modulator – disrupts insects' nervous system. Inhibits mixed function oxidative system. |
| <b>Class of Chemistry</b>             | Pyrethroid, synergist  |
| <b>Respirator Required</b>            | Not required   |
| <b>Mix or Dilute in</b>               | Water only   |
| <b>Activity</b>                       | Residual – up to 12 months   |
| <b>Shelf Life</b>                     | 3 years in original commercial packaging   |

### Use Areas

#### Indoor in Food and Non-food Areas, such as:

Homes  
Food processing plants  
Restaurants  
Schools  
Warehouses  
Hotels

#### Outdoor Perimeter Treatments to Areas, such as:

Around garbage cans  
Porches  
Patios  
Carports  
Garages  
Fence lines

#### On Trees, Lawns, Landscapes and Turf

#### In and Around Livestock Housing

## Method of Application

- Indoor and outdoor broadcast surface treatment
- Crack and crevice treatment
- Spot treatment
- Perimeter spray
- Foliar spray treatment
- Tank mix or apply alone
- Injection into wall voids

## Best Practices when using Onslaught® FastCap Microencapsulated Insecticide

### Dilute with water only

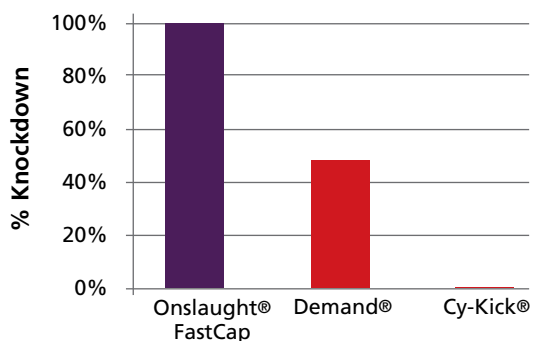

The suspension is only intended for dilution in water, not oil.

**% Knockdown after 15 minutes**  
Black Widow, *Latrodectus*

SRL Lab 2012

**% Knockdown after 15 minutes**  
Bark Scorpion, *Centruoides*

SRL Lab 2012

For a complete list of insects controlled, refer to the product label.

Always read and follow label and MSDS directions.

### Test the surface first

Onslaught FastCap may be sprayed on any surface that will not be stained by water. If you are concerned about staining or are not sure if a surface is water safe, test the surface by spraying a small amount in an inconspicuous area before making a broad application.

### Mixing tip

Shake Onslaught FastCap bottle well prior to mixing. Clean spray equipment before using or diluting Onslaught FastCap. For dilution, add ½ the required water to spray tank, then add the appropriate amount of Onslaught FastCap. Agitate the mixture, and then slowly add the remainder of the water. Agitate the spray thoroughly before using and also occasionally during use to ensure dispersion. If you use a spray filter screen, they should be 50 mesh or larger.

### Use Onslaught FastCap as part of an IPM program

Tank mix Onslaught FastCap with an IGR such as NyGuard® IGR Concentrate to break the insect growth cycle and control future emerging insect populations. Do not apply Onslaught FastCap as a fog or space spray. Fog first with a product such as Riptide® Water-Based Pyrethrin ULV to get the quick knockdown action of the fog followed by a surface application of Onslaught FastCap for residual control.

## Key Insects Controlled

### Onslaught FastCap is labeled for the control of the following insects and other listed pests:

- |                                    |                         |
|------------------------------------|-------------------------|
| Ants                               | Saw-tooth Grain Beetles |
| Asian Lady Beetles                 | Scorpions               |
| Bed Bugs                           | Small Flying Moths      |
| Boxelder Bugs                      | Spiders                 |
| Carpenter Ants                     | Stink Bugs              |
| Cockroaches                        | Swarming Termites       |
| Confused Flour Beetles             | Ticks                   |
| Darkling Beetles (lesser mealworm) | Wasps                   |
| Face Flies                         | Yellow Jackets          |
| Fleas                              |                         |
| Fruit Flies                        |                         |
| Horn Flies                         |                         |
| Hornets                            |                         |
| House Flies                        |                         |
| Indian Meal Moths                  |                         |
| Lesser Grain Borers                |                         |
| Mosquitoes                         |                         |
| Red Flour Beetles                  |                         |
| Rice Weevils                       |                         |
